

Edinburgh fest comes to city

Bangalore: Getting to work with real surgical instruments, playing with polymers, getting tips on how to do mental calculations, working on basic computer software programming — this science festival vouches to be exciting.

The 26th Edinburgh International Science Festival from August 30 has in store 15 interactive workshops, live shows and exhibitions for enthusiasts of every age group in the fields of health, solar power, astronomy and mathematics. The 10-day festival, hosted by Bhartiya City, expects 50,000 visitors. TNN
